

Clear 1/4" Quilting Foot

(BLSA-CQF)

Instructions

The Baby Lock Clear 1/4" foot is an excellent addition for any sewer/seamstress that wants additional visibility while stitching the perfect 1/4" seams or topstitching.

Instructions:

1. Remove and replace the presser foot with the Clear 1/4" Quilting Foot.
2. Select the straight stitch in the center needle position when using this foot. The Baby Lock foot is designed with a single opening to help support the fabric, prevent puckering and ensure accurate stitching.
3. Align the edges of the fabric against the side of the foot. Lower the foot and sew.
4. The red markings on the foot are to aid in stopping starting and pivoting. Watching and using these markings as alignment points is important when you are topstitching or stopping an exact 1/4" from an edge or a corner.
