

BABY LOCK SEWING ACCESSORIES

Flex Reaction Foot

(BLQP-FR)

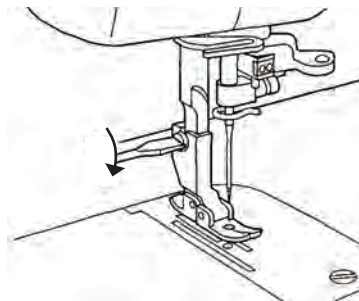

Instructions

This advanced foot is great for creating seams with a topstitch on fabrics that are difficult to feed, like silk, leather, velvet, vinyl, micro fibers and suede. The built-in spring keeps fabric from sliding, giving you great control as you stitch.

INSTRUCTIONS:

1. Raise the presser foot and raise the needle to the highest position.
2. Loosen and remove screw using the screwdriver included with your machine.
3. Attach the Flex Reaction foot and tighten the screw.
4. Engage pin feeding according to the thickness of your fabric for easy feeding or otherwise hard to feed fabrics.
