

BABY LOCK SEWING ACCESSORIES

Zipper Foot

(ESG-ZF)

Instructions

The Baby Lock Narrow Zipper Foot allows you to move your needle to a number of different needle positions in order to get close to the teeth of the zipper or to attach piping or decorative cording.

1. Remove foot and attach snap-on narrow Zipper Foot.
2. Select the straight stitch.
3. Adjust the needle position using the stitch width carefully so the needle will not hit the foot while stitching.
4. Turn the handwheel to check needle alignment before sewing.

Note: ESG/ESG2/ESG3 and ESE/ESE2 machines will require the use of an adaptor with this foot.
